

5: Hazardous Weather

Our agents returned from their most recent climate survey with this supposed list of weather phenomenon, but we found it a little baffling. Maybe you can help us make sense of it?

Just a little bit of atmospheric electric discharge

Dramatic Italian reaction to, and mispronunciation of, a harbor wave

Giant lumps of ice with baleen and blowholes

Tremors that shake the whole room, especially the fireplace

A violent storm of pasta sauce

The volcano exploded AGAIN?

This tropical storm destroys the pigs' home

A large windstorm? Deer me!

Storm system made out of ninja throwing blades
