

Lost Languages

I set out to discover the secrets of the lost city of Kelv - the Kelvans lived there for many centuries, then the Lomothians lived there for many centuries beyond that. However, both the Kelvan and Lomothian languages have been lost to time. I found a priceless artifact - an ancient Lomothian translation key for a piece of the Kelvan language. Unfortunately, my life ebbs before I can unravel them further, and I know my end is near, but I was able to figure out that Kelvan letters correspond to words representing basic concepts, while Lomothian, shockingly enough, corresponds directly to English with a different alphabet! I also solved one line of the Kelvan-Lomothian key - can you solve the rest, decode the Kelvan and Lomothian alphabets, and complete my life's work?

COLD WATER = I C E
 ✚ ✓ = Θ ω β
